

ECC Neighborhood Initiative – February Wrap-Up
February 29, 2008

Pro-pedestrian and pro-cyclist advocates spoke out at several community meetings throughout New Haven in the month of February.

Many more community meetings are coming up each month, and will be posted on the general ECC listserv. Please also see the other files posted on this website for details about how we can advocate for a bike-friendly city.

The New Haven Independent wrote articles about several of the meetings this past month, which can be seen at the following links. Concerns raised by the community included the need to provide traffic calming solutions, bike lanes, bike-train connections, bike racks, better connections to existing Greenway trails, and traffic enforcement.
